## `.animateContentSize()`

```
Column(  
    modifier = Modifier.animateContentSize  
) {  
    groupedVisits.forEach { year ->  
        val yearStr = year.firstOrNull()?  
        Surface(  
            modifier = Modifier.clickable {  
                expandedYear =  
                    if (expandedYear == yearStr) {  
                        ...  
                    }  
            } { ... }  
        ) {  
            ...  
        }  
    }  
}
```
